To Whom It May Concern:

I have worked with Sloan Fencing and Construction on numerous occasions, one of which was the construction of Runway 9/27 at the Boise Airport in Boise, Idaho. The project was designed and built for the Idaho Air National Guard and eventually will expand for use by the Boise Airport. The project consisted of a new short-field assault strip runway, roads, and perimeter security fence. This project was challenging due to large quantities of surface basalt layers and multiple phases of construction. Sloan Fencing completed 32,000 linear feet of chain link fence, along with 31,000 linear feet of underground protection fencing. They also installed numerous gates and erosion control features for the project.

Sloan Fencing aggressively pursued the project and was successful in completing the project to the owner's satisfaction. They responded accordingly to all the changes that we requested and implemented the changes effectively and efficiently.

I have worked with Sloan Fencing on multiple occasions and feel they are dedicated contractors who perform exceptional work.

If you have any questions, please feel free to contact me at (208) 383-3110.

Sincerely,

A handwritten signature in cursive script that reads "Nicole Hortness".
