

Sloan Security Fencing Inc.

RE: Performance
Flight Line Security Fence Project
Camp Pendleton Ca,

Sloan Fencing served as our primary subcontractor on a design build project at Camp Pendleton California. South Bay EDC Inc. along with the Government as the owner were extremely satisfied with both the product and the professionalism with which Sloan Fencing operated. They were invaluable in both the design and installation of a security fence which ran the entire length of the flight line on the Marine Corps Air Station Camp Pendleton California. They were timely with all required paper work and communications. They met or exceeded our schedule and dealt with many design issues that could have impacted our schedule. They were innovative in design concepts and construction techniques to help us produce a superior product while maintaining a safe working environment. We appreciate working with a contractor of Sloan Fencing's quality and look forward to working with them again on future projects.

Respectfully,

David Crafton
Project Manager
